

Introducing VarSeq: *Variant Discovery & Gene Panels Made Easy*

varSEQ™

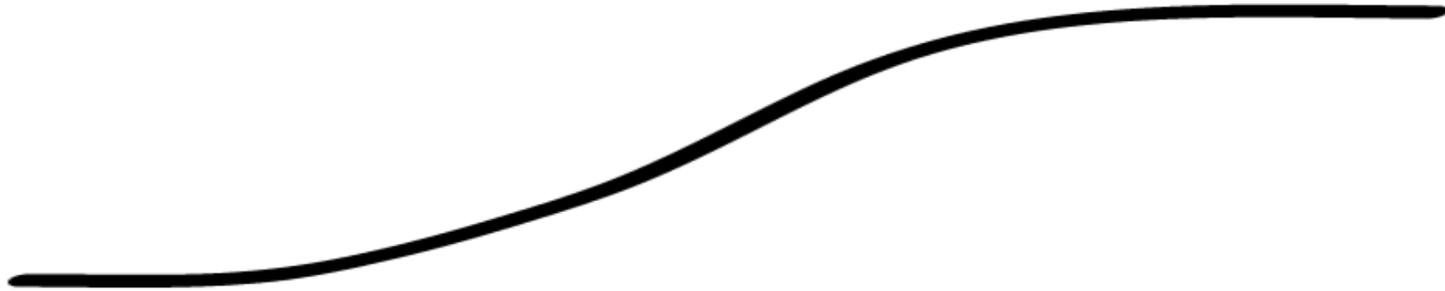

Gabe Rudy with intro from Andreas Scherer
October 1, 2014

We are building the MRI for the genome!

The analysis of genomic data and the prediction of outcomes reshapes the way we diagnose disorders, predict outcomes and select the best possible care options for a patient.

Genetics Adoption Curve

Early Stage	Moderate Adoption	High Adoption
Market focus is on science and research, lack of infrastructure, clinical evidence and physician education.	Clinical genetic standard for selected targets and therapeutic areas. Bioinformatics increasingly crucial for diagnosis and treatment selection.	Greater availability of data around testing with genetic services becoming standard of care for a majority of patients.

Regulatory Landscape	Reimbursement	Bioinformatics
Testing Technology	Physician Adoption	Consumer Demand

Introducing VarSeq: *Variant Discovery & Gene Panels Made Easy*

Agenda

1 Roots of VarSeq

2 Demo

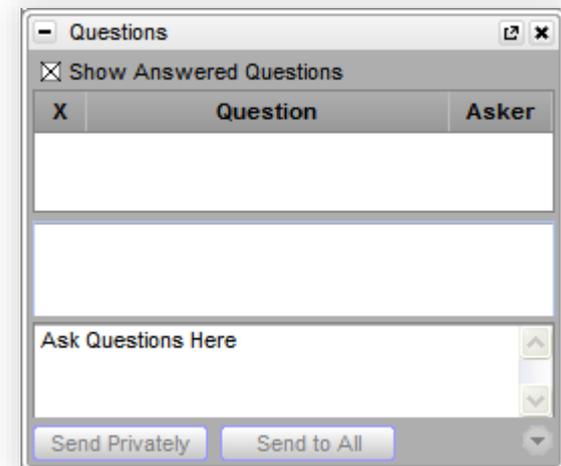

3 What's Next at Golden Helix

4 Questions

Questions During the Presentation

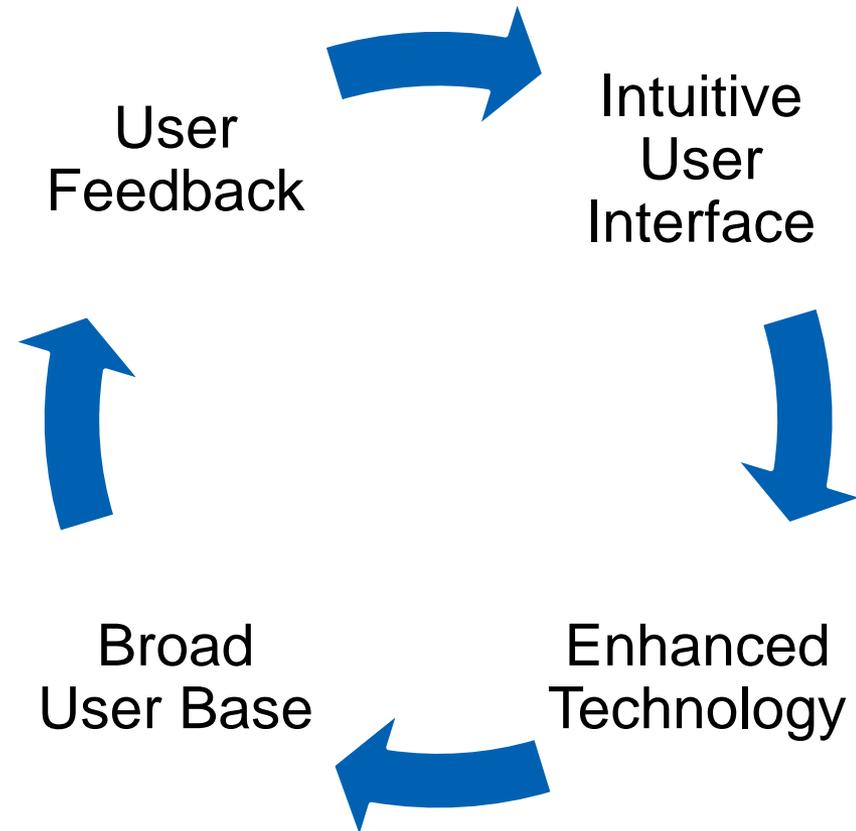

Use the Questions pane in your GoToWebinar window

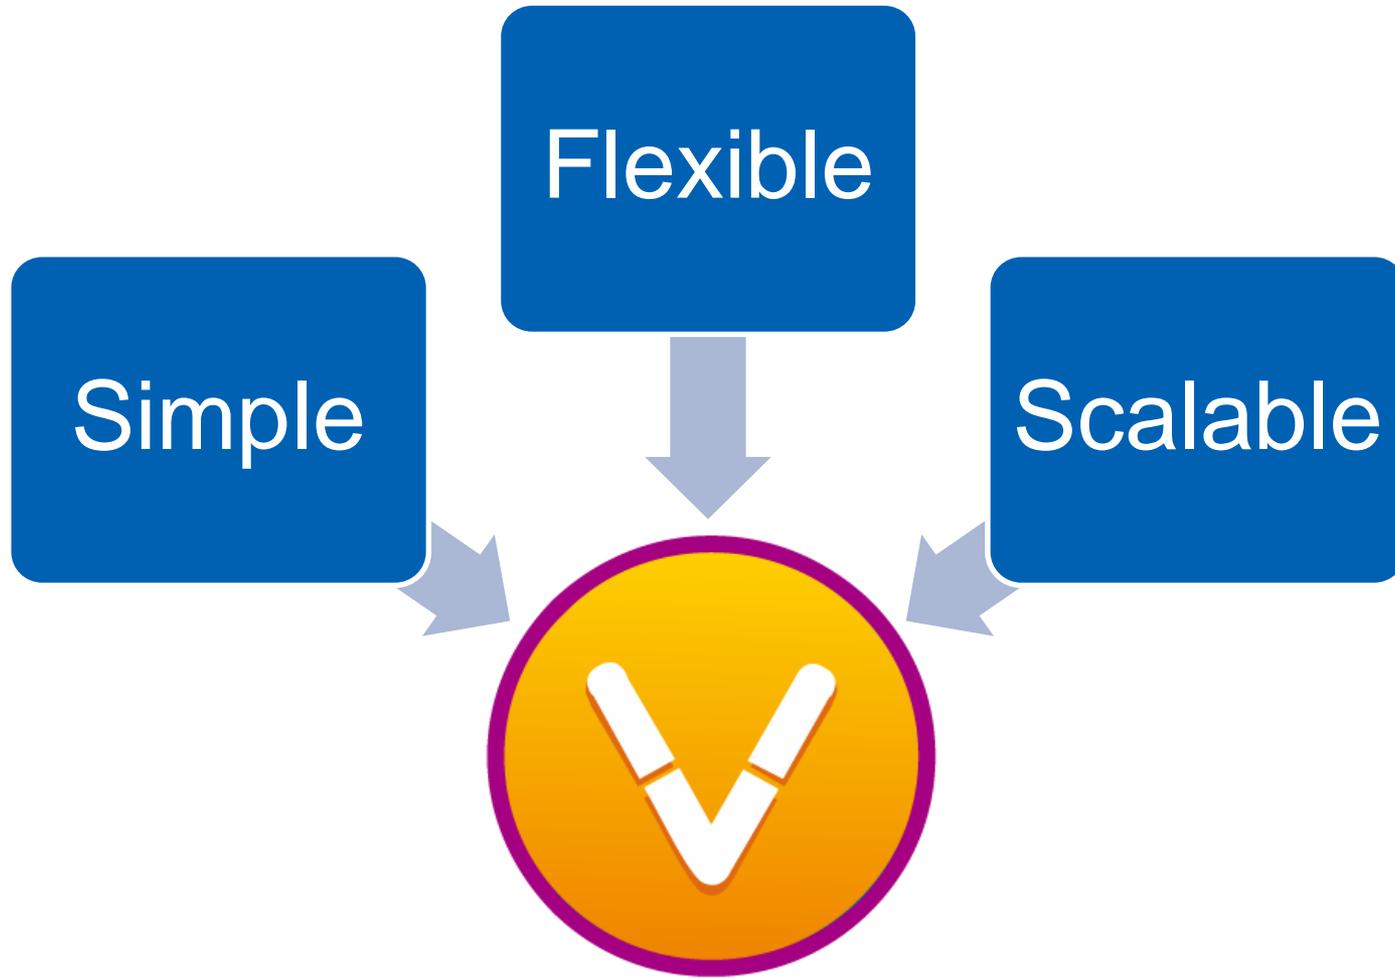

Built on Strength

- Experience empowering users to solve hard problems
- Tight feedback loop with users and stakeholders
- Support users with licensing models aligned with customer interests
- Evolve and share core technologies across products

Showing not Telling

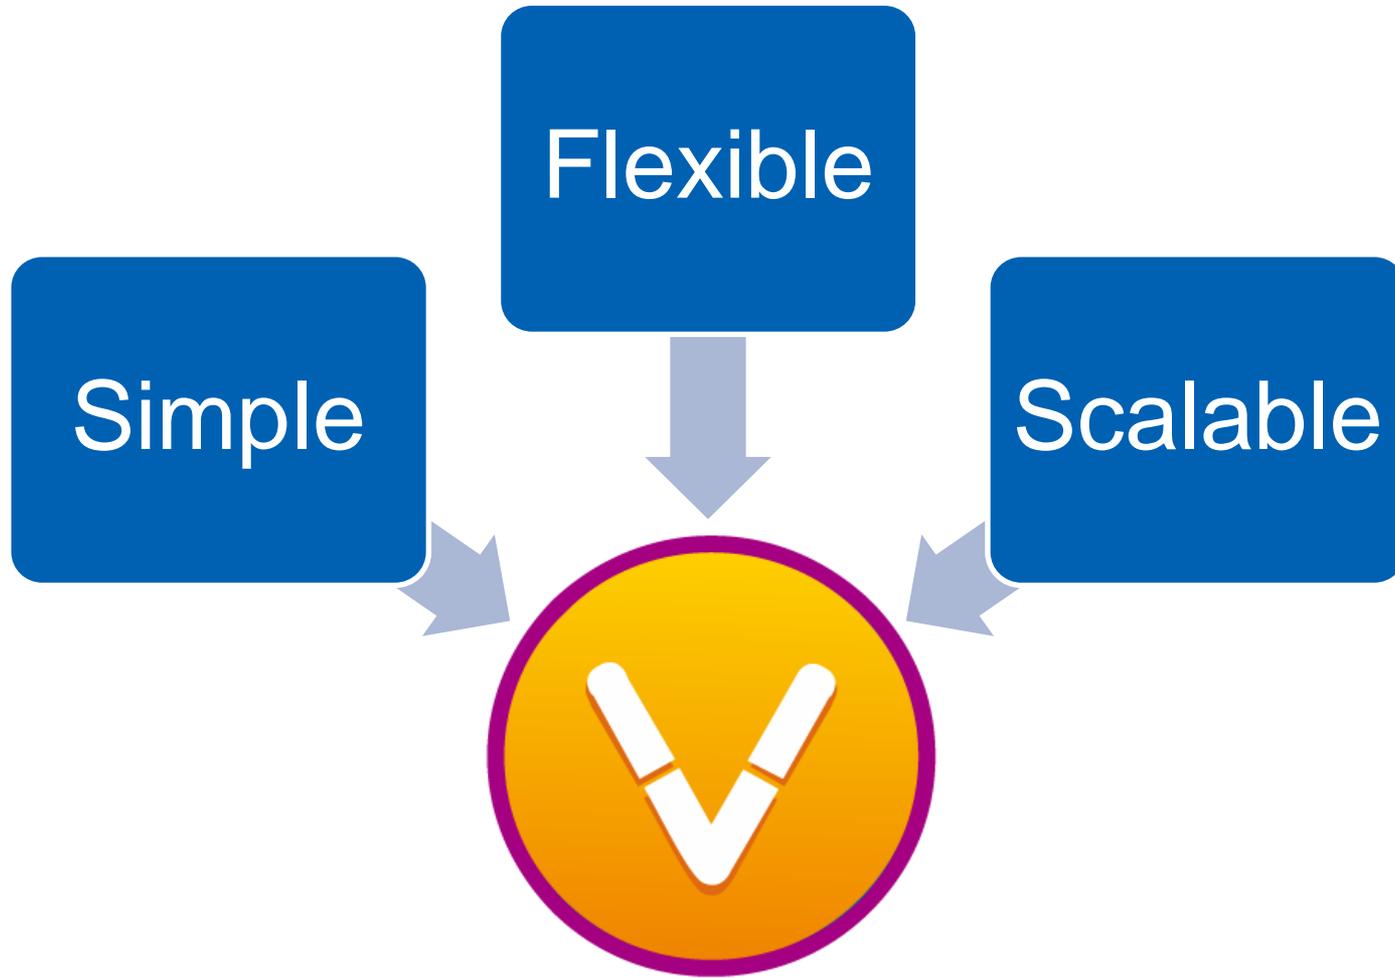

- Get started easily
- Utilize pre-built best practice workflows
- Analyze samples in batches
- Focus workspaces to accelerate sample turn-around

[Demonstration]

Showing not Telling

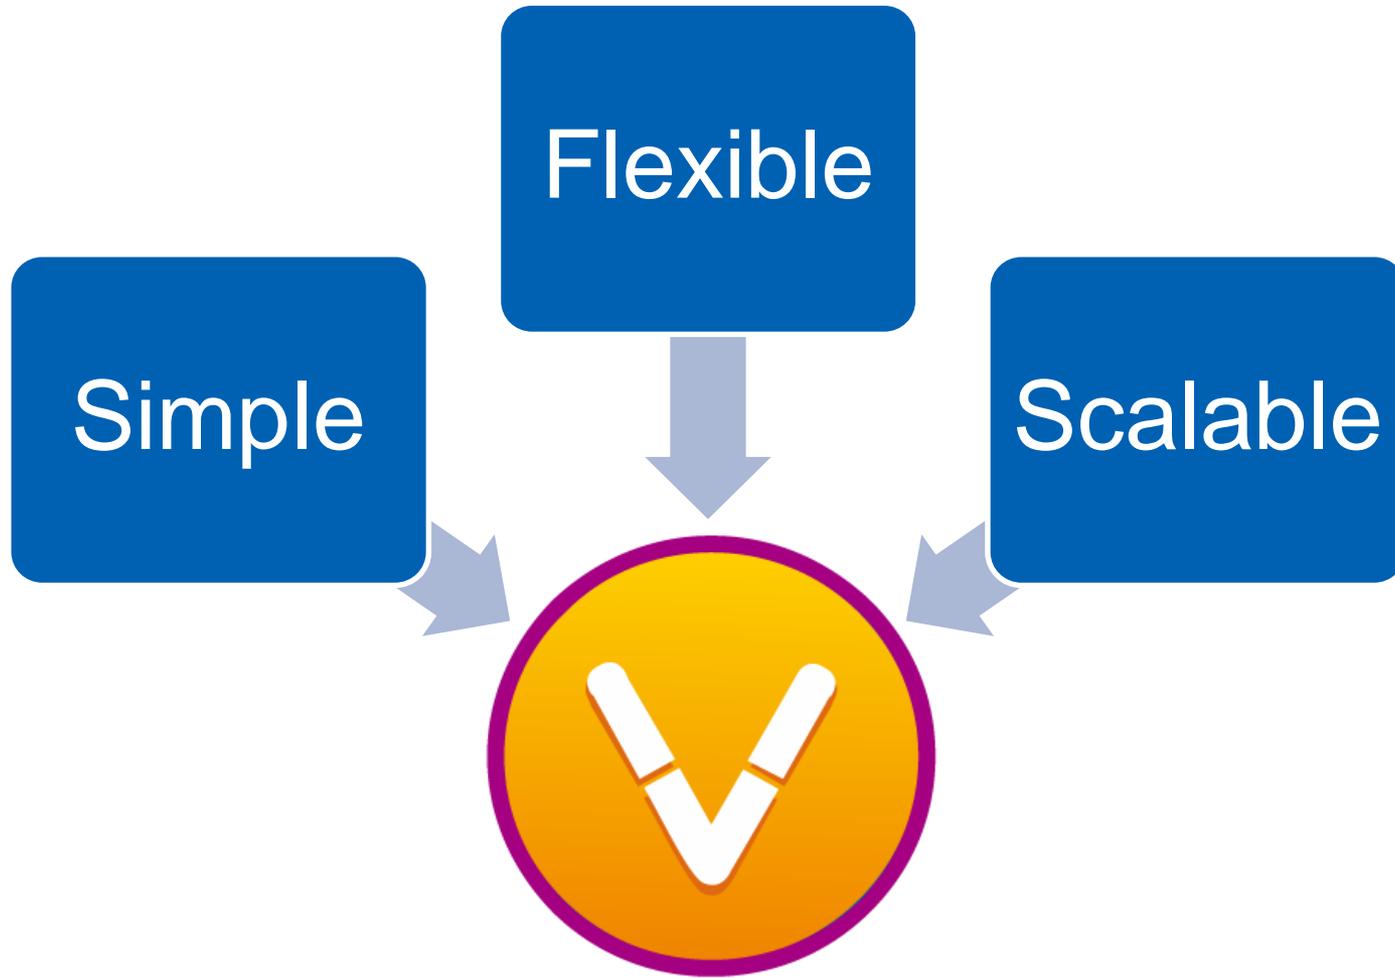

- Drilldown with context
- Annotate from extensive library of public databases
- Filter on any field of a data source
- Visualize sample and public data with GenomeBrowse
- Arrange quadrants to support multiple vantage points
- Document insights with supporting evidence

[Demonstration]

Showing not Telling

- Analyze millions of variants
- Investigate multiple hypotheses in tandem
- Validate robustness of filtering thresholds
- Export results to VCF, text, and multi-tab Excel files

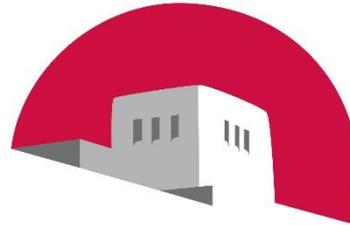

[Demonstration]

Announcement

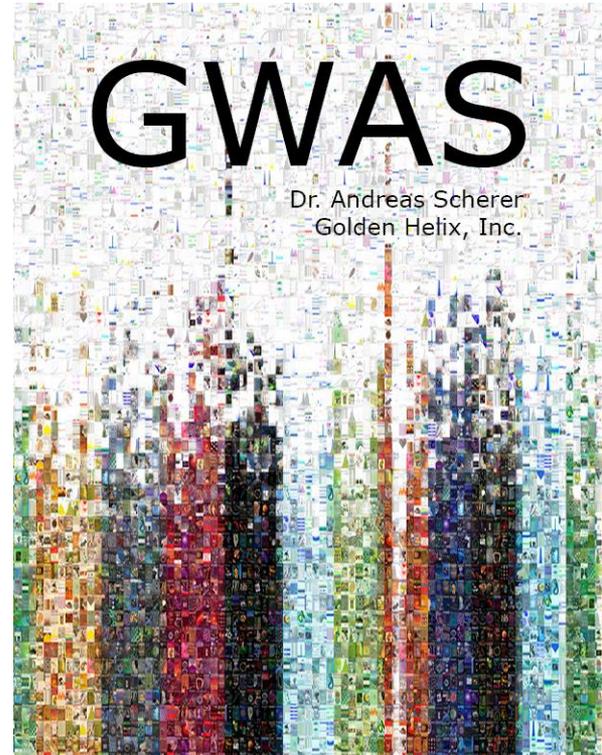

Commercially Available

Golden Helix gives back

More features and capabilities

**Release of 8.3:
More Genomic Prediction,
More Methods to Study
Complex Diseases**
